Submission Date : July 24,2022

Introduction

For University students before the semester beginning, course selection is mandatory. They could not choose any course but, there is a limitation to how many courses or which courses a student can select. This application will contain all that information of a student and will also help students select their course based on their previous semester and department.

Objective

- To help students to select their courses before the beginning of a semester.
- .Get to know the past grades.

Target Customers

Students :Students who will use our service to select courses .They will also know the past grades with the courses.

Value Proposition

This website will reduce the bothering and time of going to a senior student to ask them for helping out on course selection. We don't have to go to a faculty for course selection. Students can select their courses on their own.
